SITUATION SUMMARY

2017 Statewide Winter Storms

Cal OES Coastal Region

Paul's Slide, State Route 1, Monterey County

Per Cal OES Coastal Duty Officer (CDO), as of 1300 hours on 05/25/17, Paul's Slide on State Route 1 has been closed to all traffic.

- · Caltrans engineers report slide activity and the area has been closed in the interest of public safety.
- · Assessment will commence and further details will be provided once released.
- State Route 1 opened briefly on 06/02/17 for locals and delivery access. Full closure resumed the evening of 06/02/17 through Tuesday 06/06/17 in the evening.

Mud Creek Slide, State Route 1, Monterey County

The Mud Creek area on State Route 1 sustained a major slide on the evening of 05/20/17, when over a million tons of rock and dirt fell down the slope continuing down to the ocean floor 250 feet off the shoreline.

- The Mud Creek area is ½ mile in length, made up of five slides, four of which fell during this single incident and consolidated into one slide. The remaining slide now extends 1,500 feet in length over State Route 1 and is about 35 to 40 feet deep.
- Roadwork at Mud Creek was suspended and heavy equipment removed last week due to the threat of new slides and for safety of highway workers. Caltrans geologists and engineers plan to assess it further when this area stabilizes.
- There is no estimate when this section of State Route 1, approximately nine miles north of the San Luis Obispo/Monterey County line will reopen.

Pfeiffer Bridge Incident, Monterey County

California Highway Patrol (CHP) and Caltrans had a hard closure on the Pfeiffer Bridge on HWY 1 at mile marker 45.52 (SB Sycamore Canyon and the Bridge) due to a crack in the bridge. The bridge has been demolished so the road is closed and estimates for some access from the north is late September 2017.

- Backup air medical transport plans have been developed for medical emergencies through Cal OES Law Enforcement Branch.
- All businesses north of the Pfeiffer Canyon Bridge closure are open to the public.

SITUATION SUMMARY

2017 Statewide Winter Storms

Cal OES Inland Region

River Forecast – The following river is forecast to meet or exceed Flood stage:

- Mariposa County:
 - Merced River at Pohono Bridge is forecast to exceed flood stage on and off at above 10.0 feet and up to 10.6 feet through 06/09/17.
 - Western portion of North Pines Campground, located at the east end of Yosemite Valley between the confluence of the Merced River and Tenaya Creek, begins to flood. Water rises to the base of the swinging bridge downstream from Chapel Meadow.

River Forecast - The following rivers are forecast to meet or exceed Monitor Stage:

- Placer County: Truckee River at Truckee
- · Alpine County: East Fork Carson River at Markleeville, West Fork Carson River at Woodfords

Please see link for River Forecast Guidance - http://www.cnrfc.noaa.gov/

Cal OES Southern Region

River Forecast - The following river is forecast to meet or exceed Flood stage: Mono County:

- West Walker River at Highway 395 below Little Walker is forecast to exceed flood stage at 6.0 feet and up to 6.8 feet through 06/09/17.
 - At 6.0 feet: Flood Stage. Some minor flooding of lowlands, pastures and rural roads. Maximum diversion to Topaz Lake is about 1300 cfs. Remainder goes down the West Walker to Smith Valley/Wellington. If Topaz is releasing, flow at Wellington will be Topaz release plus amount going the West Walker below the Topaz diversion. Approximately 3000 cfs.
 - At 6.6 feet: Minor to moderate flooding of lowlands, pastures and some rural roads along the river from Walker to Topaz Lake.
 Moderate flooding on the lower West Walker (Smith Valley/Wellington) and mainstem Walker (Mason Valley/Yerington). Some sandbagging of structures likely in the Mason Valley/Yerington area. Approximately 3800 cfs with a 1 in 10 chance of occurring any given year.

WEATHER SYNOPSIS BY REGION

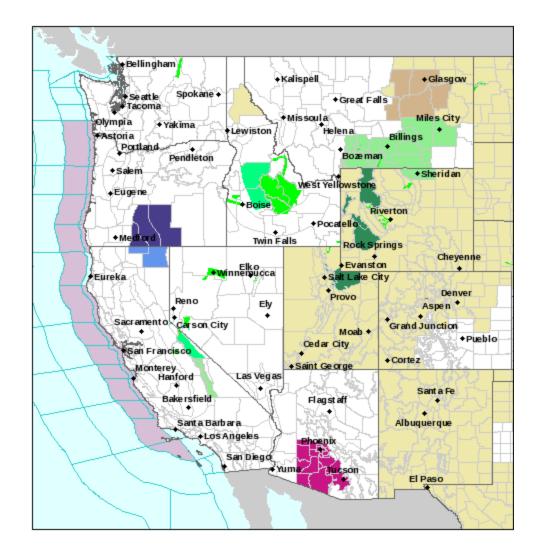

NORTHERN CALIFORNIA

Temperatures will cool a bit and southwest winds will increase on Saturday, and afternoon cumulus buildups are expected over the higher terrain. There is a slight chance of showers or thunderstorms in far northwestern and northern California late Saturday. Similar conditions are expected on Sunday as the low pressure trough moves overhead. Southwest to west winds will further increase, with gusts reaching 25-35 mph in the afternoon through the delta and in wind-prone mountain locations. There is a slight chance of showers or thunderstorms late Sunday near the Oregon state line. On Monday and Tuesday a light south to southwest flow will develop as a stronger low pressure trough develops offshore. Temperatures will warm a bit. Winds and clouds will increase on Wednesday as the trough approaches the coast. There is a chance of rain showers in far northwestern California Wednesday night, and at this time forecast models show cool breezy conditions with widely scattered showers across much of the region for a few days beginning Thursday.

SOUTHERN CALIFORNIA

A ridge of high pressure will build over the Desert Southwest bringing a little warming and drying Monday through Wednesday. Maximum temperatures will be in the upper 70s and 80s across the mountains and upper 80s and 90s in the valleys. Minimum humidity will be mainly between 12% and 25% away from the coastal areas. Winds will be light Monday through Wednesday morning. A Pacific trough will drop down the West Coast bringing significant cooling and an increase in humidity to the region Thursday through next weekend. Temperatures will be below normal by Friday. Strong and gusty westerly winds will surface across the mountain ridges and desert passes Wednesday afternoon through next weekend.
